REFERENCE LETTER FOR G HARRISON ELECTRICAL LTD

Gavin Harrison has worked for us on several occasions over the past seven years; originally as a partner in Askwith Electrical Services and later with his own company. During this period we have been refurbishing the offices at our main site in Eckington, Sheffield. These offices house around two hundred IT based staff and all main areas have now been refurbished.

Gavin has been responsible for carrying out the rewiring of our electrical, data and telecoms installations during these refurbishments. The electrical installations have been fully certified. The data cabling has been to category 6 standard and the telecom cabling has been done in accordance with our own requirements. Gavin has also been responsible for the rewiring of our main server room, including a combined uninterruptible power supply/standby generator system which provides power for our entire main server room and other essential services on our site.

Gavin also oversaw major rewiring during our recent office extension/refurbishment project. Entire areas were rewired (electrical, data and telecoms) and we were happy to use Gavin's company again because we knew that their work would be of a high level.

I have been very happy with the work carried out by Gavin. He has always ensured that all work has been carried out in a professional manner and has worked flexibly with our changing requirements as the projects progressed, producing little disruption to our business.

Although the refurbishment work is complete, we still have requirements for electrical work on our site and Gavin is always happy to assist us and fit in with our work requirements.

I would not hesitate to recommend Gavin and his company.

Yours sincerely
CSE-Global (UK) Limited

Paul Mosley
